Tips to save your business money through recycling

From waste...

1

Recycle more:

Understand what types of recyclable materials you produce and what can be separated and recycled.

2

Green and clean:

make sure any cleaning staff are fully conversant with your recycling policy and recycle as part of their work.

3

Keep it simple:

Make it easy for everyone to recycle, 9 out of 10 said they would recycle more if it were made easier.

4

Rethink your rubbish:

Save on landfill tax, 60% of bin waste can be recycled so separate any recycling from the general waste.

Turn over a new leaf:

Recycle all that waste paper and save energy at the same time. It costs 70% less energy to process recycled paper than it does to produce it from scratch.

Set yourself a target:

improve on your current practices, set a new target and monitor regularly with 6 monthly reviews.

Keep your workplace tidy:

a messy workplace with no constructive waste plan will contain redundant materials that could be recycled.

8

Plastic fantastic:

reduce the weight of your general waste bin and recycle that plastic.

Educate: Ensure all staff members are involved and understand how best to save on waste and recycle more.

9

and finally: Understand the Waste Hierarchy, take care with your procurement to prevent waste in the first place and adhere to the Duty of Care to make the best use of the waste you create.
